

Compact, Powerful and Integrated X-ray System

Powerful and Practical

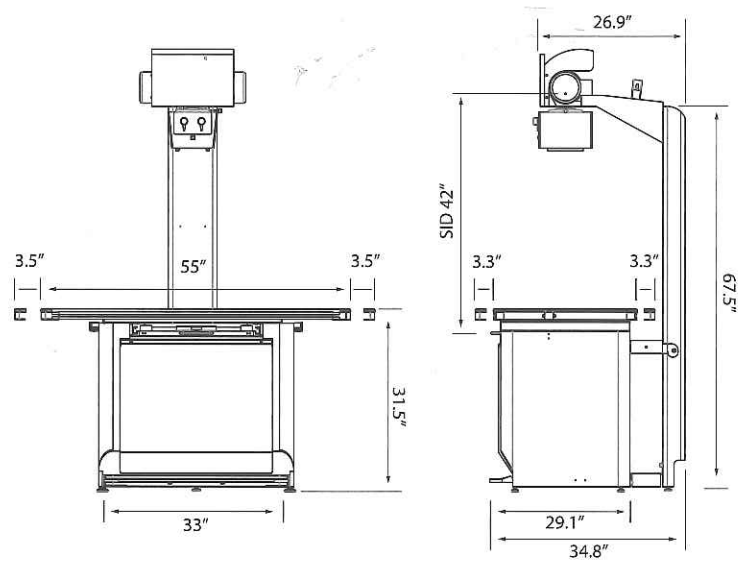

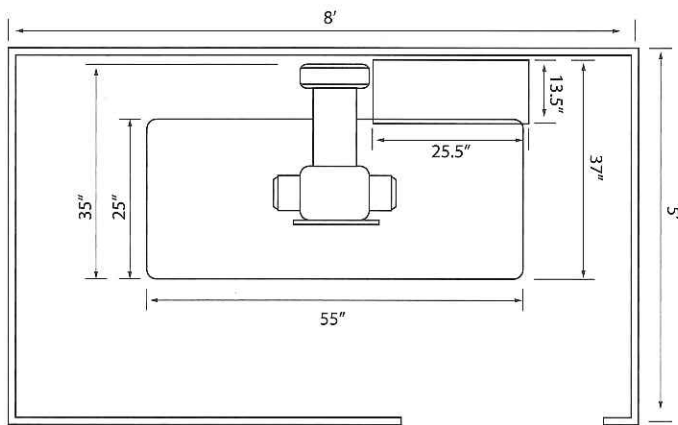

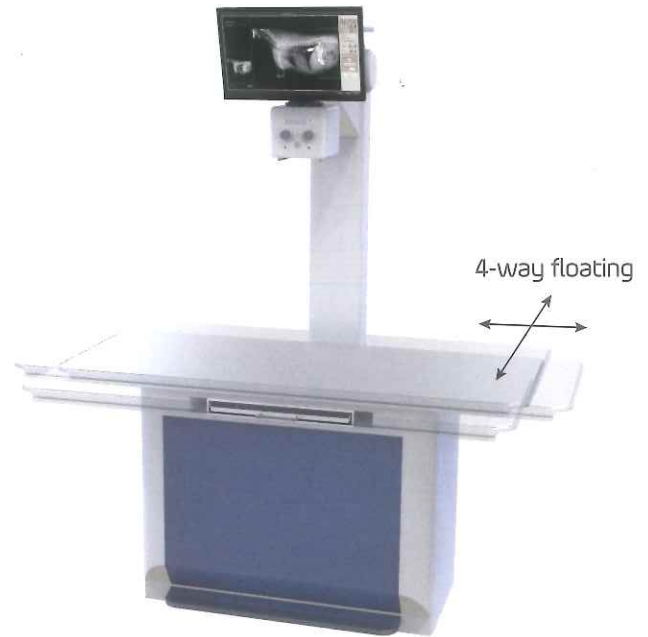

The 32kW high frequency generator ensures the lowest dose exposures by optimal exposure techniques by selecting the maximum mA based on kVp and mAs. A rotating anode x-ray tube with dual focal spots provides superb image quality for confident diagnosis.

Integrated and Efficient

A robust tube stand mounted directly to the table that houses the generator offers the most space-saving solution for any clinical environment. Spring-activated locks quietly release the four-way floating tabletop that helps calm animals as they are positioned on the table.

Compact and Convenient

The X500, with a small working footprint and tethered 17 x 17 inch Cesium Iodide flat panel detector, provides a veterinary practitioner a compact and powerful digital x-ray system for all of their imaging needs.

Flat Panel Detector

Detection Area	17 x 17 in
Sensor Type	Amorphous Silicon with TFT
Scintillator	Cesium-Iodide[CsI]

* Specifications subject to change without prior notice *

Generator

Model	X500
Max Output	32kW
kV Range	40-125kV
mA Range	10-400mA
mAs Range	0.1-500mAs
